- Work began last week at King & Market Streets on the electrical conduit. Damage was discovered to the brick archway storm drain in the same area and repair work will begin on this August 11th. Approximate repair time is two weeks. As work progresses in the two week look ahead, the situation will be reviewed for resuming electrical ductbank work. The parking lane and west side traffic lane will be cordoned off for the work/safety area, but there will be one lane of through traffic on the east side traffic lane of King Street.

- The water line connected to the Days Inn was moved this week. Electrical ductbank work on Horlbeck Alley continues with transformer pad installations planned. The street remains closed to through traffic from Meeting Street. BB&T bank drive in customers and #15 Horlbeck Alley residents will continue to exit to King Street off Horlbeck Alley.

- In the two week look ahead, electrical conduit work will probably begin on Fulton Lane. A traffic plan is being developed and stores, parkers and residents will be advised.
