Agenda Item B-3: Maybank Highway

Carolyn	Powless	2860 Thunder Trail, Johns Island	<p>The City and the BZA should ELIMINATE or at least further minimize the impact on the trees. Preserving individual trees is important, but so is preserving groves of trees and limiting the impact of development on their root systems. Charleston Zoning and Planning Brochure states as follows: Trees are an essential natural resource, an invaluable economic resource, and a priceless aesthetic resource. Trees play a critical role in purifying air and water, providing wildlife habitat, and enhancing natural drainage of stormwater and sediment control. They also help conserve energy by providing shade and buffering different land uses and beautifying the landscape. The Tree Protection and Preservation regulations of the Charleston County Zoning and Land Development Regulations Ordinance are intended to enhance the health, safety, and welfare of Charleston County Residents. Nowhere does it say "to help the developers". It is time to stop allowing all the natural beauty and usefulness of trees on Johns Island to be destroyed.</p>	Jan 30 2023 11:09AM
Chris	Murray	2114 Mimolette Lane	<p>Hi, The priority on this for me is maintaining the gift of nature we have here on Johns. Please enforce that the developer work with the City and the BZA to eliminate or at least further minimize the impact on the trees. Preserving individual trees is important, but so is preserving groves of trees and limiting the impact of development on their root systems. It feels like developers always win, from watching the streams of meetings. I'd like to see nature win for once over money! Thanks, Chris.</p>	Jan 30 2023 12:08PM
